As you may or may not already know, Utah gets much of its electricity from PacifiCorp, which operates two coal power plants in Utah and another four coal plants in Wyoming. Recently, PacifiCorp announced that it would close one of its oldest coal plants and part of another by 2025 in favor of renewable energy like wind and solar. But some of its other coal plants would stay open until 2042. Some people have proposed a plan to phase out all of PacifiCorp's coal plants across Utah and Wyoming by [SPLIT A: 2030 / SPLIT B: 2035] and replace them with renewable energy.

<b>QV1.</b> Just based on what you know, do you support or oppose the state enacting this proposal? [IF SUPPORT/OPPOSE] And is that strongly or somewhat?		<b>SPLIT</b>
